Please follow our Facebook page for updates and
changes in hours and days during COVID-19 (Project
DAWN Cuyahoga County)

This program is for individuals who use opioids or individuals who know someone who uses opioids and is
at risk of opioid overdose. Common opioids include heroin, OxyContin, methadone, Percocet and fentanyl.

We will teach you how to recognize an overdose, how to respond to an overdose and how to administer
naloxone to reverse an opioid overdose. We will provide you with a free kit containing the lifesaving opioid
overdose antidote naloxone.

Come to any open walk-in clinic or call MetroHealth Project DAWN at 216-778-5677
