Make operational decisions with a real-time view of all of your data sources - on any device at any time.

Dynamic Health Performance Indicators (HPI) provides an up-to-the-second view of all of your organization’s data sources to enhance every operational process.

To get started...

- Learn more about features, technical details and other information at neohospitals.org/covid-19/dynamic-hpi.
- Visit dynamichpi-covid19.neohospitals.org/covid19 using the web browser on the device of your choice to see the system in action.

Dynamic HPI includes an advanced notification system, including escalating alerts, custom content and more.

Geo-Location, Maps & GPS Integration
Add latitude & longitude to any object to instantly map it, and use your GPS to show metrics near you.

Notifications & Templates
Dynamic HPI includes an advanced notification system, including escalating alerts, custom content and more.

Rapid, Powerful Configuration
The Dynamic HPI Designer lets you make changes instantly with limited training, plus there’s nothing to code.

Multiple Data Types & Views
Create and view HPIs, alerts, trends, scorecards, heat maps, bars, bullets, XY Plot, Pareto, GeoMaps and more.

Witness Changes in Real Time
This is real-time monitoring, so all views update instantly as your source data changes. Great for big screens too!

No New Master Data Source
Dynamic HPI can read from thousands of sources. It isn’t necessary to move your data or maintain a new master source.

Available On-Site or Cloud-Hosted
Dynamic HPI is real-time industrial-strength software with consumer ease of use that can be evaluated rapidly. Implementation is quick, as our team can have you accessing your own data on your preferred devices within 90 minutes.

Native Integration
Easily create HPIs and visualize real-time data from thousands of industrial (IoT, historians), web and business sources.

Access on Any Connected Device
Take your operations center with you on any smartphone, tablet, PNC/Mac/Linux and even large screens — with no software required to install on the device.

Multiple Data Types & Views
Create and view HPIs, alerts, trends, scorecards, heat maps, bars, bullets, XY Plot, Pareto, GeoMaps and more.

Personalized, Easy-to-Consume Dashboards
User, group or role-based dashboards across any device. Simply click to add or remove and drag to resize and reorder.

Advanced Features
Pro features including statistical process control, live search, advanced calculations, real-time analytics, remote configuration, links, trend comments, future data support, custom attributes and more.

Designed for Security
Encryption, data-free sharing, active directory integration and object-level security provides state-of-the-art protection without imposing new requirements.
